Protected Products

► Brother protected products are available to select resellers.

► Protected products are not available to other brick and mortar or online retailers.

► Brother’s Minimum Advertised Price (MAP) policy levels the playing field and is designed to help you be more profitable.

► Brother authorized resellers have access to protected products: two high-volume laser printers, one high-volume inkjet printer, and three scanners.

► The HL-S7000DN is an ultra high-speed monochrome inkjet printer designed to handle high-volume printing needs quickly and cost-effectively.

► The HL-L9200CDWT is a high-volume color laser printer that prints at high speeds and can handle up to 75,000 pages a month.

► The MFC-L9550CDW is a high-volume all-in-one color laser printer that offers fast and inexpensive printing, scanning, copying, and faxing.

► The HL-L9200CDWT and MFC-L9550CDW are especially cost-effective because they come with and use high-yield toner cartridges that lower the cost per page to 2¢ and 7¢ for mono and color pages, respectively.

► The HL-L9200CDWT and MFC-L9550CDW boast superior enterprise-level security features and are flexible enough to integrate with numerous workflow solutions.

► Brother’s professional high-volume scanners, PDS-5000 and PDS-6000, enable fast and efficient scanning of large volumes at high speeds of up to 80 pages per minute and have numerous scan optimization features.

► The ADS-2000e is an inexpensive, rapid, and efficient scanning solution for businesses with mid-volume needs.
